

Mercredi 10 septembre 2025

Bienvenue!

SÉANCE 01: Introduction générale

L'équipe

Amine Akhlafa

Président

Odin Cuvillier

Communication

Alassane Dia

Nos activités

Séances du mercredi

- Tous les mercredis (*ou presque*) à partir de **12h30**, en **P324**
- Rooms TryHackMe
- Présentation de notions

Conférences

- Au moins 2 dans l'année
- Données par des experts du milieu
- Possibilité d'agrandir son réseau

Et bien plus !

- Attaques de matériel
- Cyber Range
- ...

TryHackMe

"TryHackMe is a free online platform for learning cyber security, using hands-on exercises and labs, all through your browser!"

Notre première room

L'AttackBox

Room completed (100%)

Target Machine Information

Title	Target IP Address	Expires
Lookup v1.2-badr	10.10.76.243	1h 52min 52s

[?](#) [Add 1 hour](#) [Terminate](#)

Task 1 ✓ **Lookup**

Lookup offers a treasure trove of learning opportunities for aspiring hackers. This intriguing machine showcases various real-world vulnerabilities, ranging from web application weaknesses to privilege escalation techniques. By exploring and exploiting these vulnerabilities, hackers can sharpen their skills and gain invaluable experience in ethical hacking. Through "Lookup," hackers can master the art of reconnaissance, scanning, and enumeration to uncover hidden services and subdomains. They will learn how to exploit web application vulnerabilities, such as command injection, and understand the significance of secure coding practices. The machine also challenges hackers to automate tasks, demonstrating the power of scripting in penetration testing.

Note: It is recommended to use your own VM if you'll ever experience problems visualizing the site.

 Answer the questions below

What is the user flag?

Applications Placeholder Sun 7 Sep, 10:07 AttackBox IP:10.10.149.71

Terminal

```
File Edit View Search Terminal Help
01
This machine can access other machines you deploy on TryHackMe.

Please keep in mind the following:
1. Pentesting any target that is not deployed by you on TryHackMe is prohibited.
2. You are solely responsible for your actions.
3. This machine expires. Check TryHackMe to ensure you still have time left.
4. Once this machine is terminated, all data will be lost.
5. If you are a subscriber, this machine is exposed to the internet and maybe automatically scanned. While the machine is secure, do not store sensitive files.

Usage Instructions:
1. Tools are located in /root/Desktop/Tools & /opt/
2. Webshells are located in /usr/share/webshells
3. Wordlists are located in /usr/share/wordlists
4. READMEs are located in /root/Instructions
5. To use Empire & Starkiller, read the following file: /root/Instructions/empire-starkiller.txt

THM AttackBox

1h 49min 12s

L'outil du jour

GoBuster

```
gobuster -u http://fakebank.com -w wordlist.txt dir
```

- **GoBuster** sert à trouver des **répertoires cachés** sur un site en testant automatiquement une liste de mots possibles (**Brute-force**).

Note: GoBuster est pré-installé sur l'AttackBox 

Université de Lorraine
=
pas fun avec la cybersécurité

Notre page Github

<https://github.com/CyberMines-Nancy>

Vous y trouverez:

- Notre planning des séances
- Un wiki avec la présentation d'outils utiles et de notions importantes (<https://github.com/CyberMines-Nancy/SEANCES/wiki>)
- Les séances précédentes, avec des solutions
- Des éléments de communication du club, etc.

N'hésitez pas à contribuer, par exemple en ajoutant vos solutions !

Merci et à la semaine prochaine !
